

Project Flow

Team ID	PNT2022TMID29184
Project Name	Project - Deep Learning Fundus Image Analysis for Early Detection of Diabetic Retinopathy

Project Flow:

- ▮ The user interacts with the UI (User Interface) to upload the image as input
- ▮ The uploaded image is analyzed by the model which is integrated
- ▮ Once the model analyses the uploaded image, the prediction is showcased on the UI

To accomplish this, we have to complete all the activities and tasks listed below

- ▮ Understanding the data.
 - Importing the required libraries
 - Loading the data
 - Analyzing the data
 - Reshaping the data.
- ▮ Model Building
 - Creating the model and adding the input, hidden and output layers to it
 - Compiling the model
 - Training the model
 - Predicting the result
 - Testing the model by taking image inputs
 - Saving the model
- ▮ Application Building
 - Create an HTML file
 - Build Python Code
